

the Johnson **77**

# ...distinctly Johnson

## Standing out from the crowd

The new Johnson Motor Yacht range stands out from the crowd, in every respect!!

The Johnson Company has been building outstanding motor yachts for nearly 30 years and when the decision was taken to create a totally new range they turned once again to one of the worlds top yacht designers, Bill Dixon. The result from the Dixon team is a stunning range of motor yachts which spans 77 to 125 feet.

The synergy between Dixon Yacht Design and Johnson Yachts is born out of many years of working together, and a mutual respect for each others abilities. The result of this close working partnership can be seen in every yacht in the range, with careful design matched by the renowned skill of Johnson Yachts boat builders and engineers.

The 77, the subject of this brochure, is a fine example of the best of European design married to the best of Far Eastern craftsmanship. If you are in the market for a motor yacht of this size she really must be seen.

# first impressions last

77

Few modern yachts create such a lasting impression as the new Johnson range. The 77's superyacht styling provides her with many more benefits than just looks. The wide beam endows the vessel with an exceptionally spacious interior and the vertical windows give her an external presence on the water normally only found on much larger vessels.

Your first impression on stepping on board the 77 can only be one of quality; not just in the workmanship of the Johnson craftsmen but also in the equipment with which the vessel is fitted.

Having been impressed by the look of the vessel both inside and out, your first trip on this outstanding yacht will ensure that your first impressions last! With wide beam also comes stability, and the beam of the 77, allied to the modified V planing hull provides the yacht with excellent performance and a very comfortable ride; a ride which is made even smoother by the standard stabilisers. Low speed handling is impressive and manoeuvring could not be easier with bow and stern thrusters.

With this superb yacht comes Johnsons legendary customer service, which starts before you sign your order, and continues throughout the build and ownership of your boat.

open to your  
viewpoint

### Your choice - sky lounge or flybridge

The 77, as with the other yachts in the new Johnson range, is available with either a sky lounge or a traditional flybridge with a bimini top. The choice provides either, more open air deck space in the case of the flybridge version, or a comfortable additional lounge, which has full protection from the elements and provides fantastic views. Both versions feature a wet bar with a fridge and an ice maker.

## Home from home

Wide beam and superyacht styling give much more than a stable ride and excellent handling. They also provide a yacht interior with living areas comparable with vessels significantly larger. More spacious living areas in the case of the 77, mean among other things the option of either a main deck owners suite or, in its place, the very popular 'country kitchen', option, with the owners suite positioned on the lower deck.

Standard equipment levels on the 77 are very high, and of the best quality. One look at the specification page of this brochure and you will realise that at Johnsons we believe that our owners should be provided with all the comforts of home. The saloon has an impressive entertainment centre featuring a 42" plasma screen TV and surround sound system for the HI FI, while in the owner and guest cabins a flat screen TV is provided. The galley is fully equipped right down to a dishwasher and a trash compactor.

The Johnson 77 has exactly the right ambience for relaxing with family and friends but, when the occasion demands, can easily be transformed for more formal entertaining and dining in style. At days end owner and guests can retire to superbly comfortable cabins.
